

# 4WD Training Program

“Operate Vehicles in the Field”

## AWCC 4WD PROGRAM BENEFITS - PMASUP236

Are you required to drive in challenging or remote environments? AWCC can help by providing a comprehensive Nationally Accredited course with the right mix of classroom facilitation and practical off-road experience and assessment. Our Instructors are off road 4WD enthusiasts that have a diverse range of field experience in both critical and non critical situations.

AWCC's unique specialised training assists our students to understand themselves regarding decision making along with vehicle capabilities empowering them to make safe and conscientious choices when conducting either work or recreational activities.

The AWCC 4WD program is a one day course delivered from our Brisbane and Toowoomba facilities weekly, every Friday without fail, AWCC have a no cancellation policy on all advertised programs.

## LEARNING METHODS

AWCC's learning methods for this course are facilitated through a face-to-face classroom environment which is supported by extended 4WD field practical and assessment.

## BOOK AWCC NOW

It's time to experience a 4WD course that gives you both the theoretical and practical knowledge that will directly impact your driving safety, decision making and overall performance.

# “Defensively Drive to Survive, in the field”

## COURSE OVERVIEW

The AWCC, 4WD Training Program focuses on six (6) key elements to ensure that all participants get the most out of their training to comprehensively Operate Vehicles in the Field.

### 1. Preparing the 4WD vehicle for the Journey:

This looks at vehicle familiarisation, pre-start checks to note and rectify defects, secure loads both externally and internally within the vehicle

### 2. Undertake Journey Management:

Route familiarisation and planning

Obtain relevant authorisations prior to leaving

Monitor driving and vehicle conditions

Establishing communication channels to ensure journey status during convoy.

### 3. Driving and Vehicle Function:

Driving on various terrains utilising both 2WD and 4WD functions of the vehicle

Carry out defensive driving techniques

Drive to suit road conditions

### 4. Finalise Journey:

Communication channels to ensure a successful conclusion of the journey.

Reporting on faults, journey events etc.

### 5. Recover Vehicles:

Jump starts, operate recovery equipment and execute various recovery techniques, Winching etc.

### 6. Maintain Vehicle Safety

Ensuring appropriate speeds are kept, seat belts are worn, vehicle restrictions and other legal requirements are adhered to.
